

SolPrint Version 15

Iteba SP Limited are delighted to celebrate their 25th anniversary with the release of the latest version of the SolPrint Management Information System.

Incorporating a new enhanced look and feel the system can integrate with clients' existing websites allowing controlled access for Customers, Suppliers, Shop Floor, Sales or Internal Users.

New Catalogue Functionality can be used to simplify the Estimating and Ordering processes. Extensive Workflow management linked to each Product can be used to drive Estimating, Production, Purchasing and the Warehousing Pick/Pack/Delivery areas.

A new version of the Scheduling module allows greater flexibility when planning the work with both Component and Batch Job support. Unlimited "What If" scenarios help to optimise resource utilisation.

The SolPrint API and JDF/JMF modules allow for seamless integration with production equipment, 3rd Party Workflow and Web2Print Systems as well as client ERP systems.

The SolPrint Outlook module allows for copies of emails to be held within the SolPrint Document Management System ensuring all information is centrally stored.

With both hosted rental and purchase solutions available, SolPrint is suitable for all sizes of business.

Why not contact us now for a no obligation demonstration where we can show you how the SolPrint Management Information System could be implemented within your operation.
